# The Risk Professional and Risk

## DRIVING VALUE ACROSS THE ENTERPRISE

Driving the process and systems to help manage risk is no small job. Risk Professionals lead the charge in establishing and executing the organization's risk approach but don't always have the support and systems needed to do so. To encourage adoption and integration in your organization, you need to make it easier – eliminating the complexity in the identification, analysis, management and control of risks with an Enterprise Risk Management solution.

### With Enterprise Risk Management, you can:

- Gain senior management support and rely on it for decision making
- Create shared accountability so you can focus on high value areas of risk management
- Ensure consistent understanding of risk and the processes for managing them
- Integrate with your organization's key business processes

Active Risk Manager is fundamental to our global enterprise risk management programme...Most importantly, we can now trust our data to be relevant and reliable which is crucial to making informed decisions on risks and opportunities and critical to supporting our risk practices in the field and around the world.

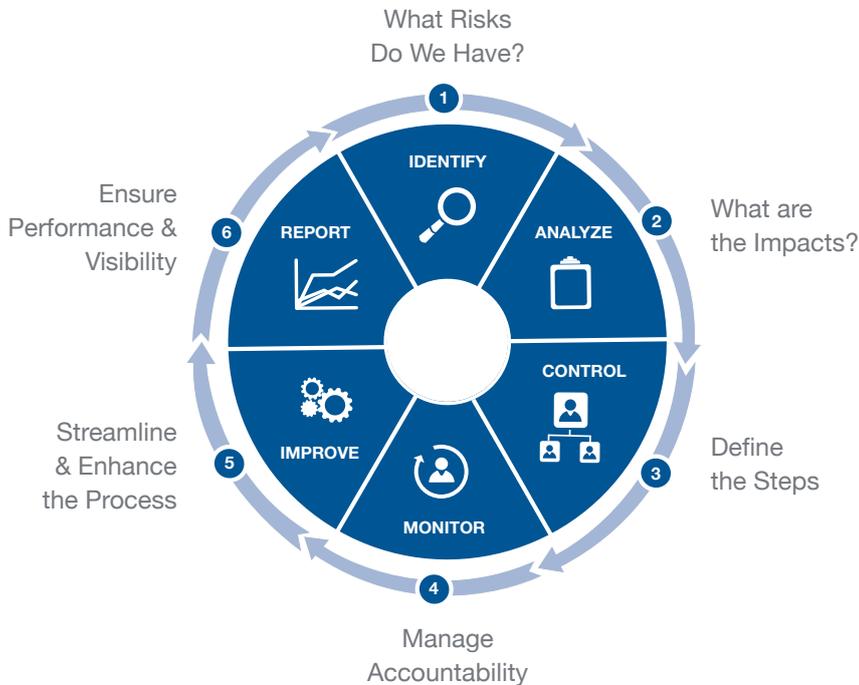

Pascal Galibert,  
Chief Risk Officer at Eurocopter

# Simplify Risk Management

Active Risk reduces the complexity of risk management by using a six-step approach that drives value across the organization: Risk Identification, Risk Analysis, Risk Control, Risk Monitoring, Process Improvement, and Reporting.

## The Active Risk Six-Step Approach to ERM

It was almost as though Active Risk Manager had been specifically written for Essen. The solution has more than a 90% overlap with our processes and way of working – so it was a natural choice.

Ype Wijnia,  
Risk Manager, Asset Management,  
Essent Netwerk BV

## About Active Risk

Active Risk is the first Enterprise Risk Management (ERM) solution provider to drive business performance by increasing an organization's riskbearing capacity. With Active Risk, you have a truly comprehensive view of your organization's risk and opportunities, enabling you to make better-informed decisions and leverage risk to create a competitive advantage.

## Active Risk Customers

ARM customers include such distinguished companies as: Lockheed Martin, Nestle, NASA, London Underground, US Air Force, Raytheon, Rio Tinto, EADS, Alstom, and Roche.

## ARM For Enterprise Risk Management

Active Risk Manager (ARM) helps eliminate major obstacles and be viewed by your organization as a tool to produce results rather than something to make them look bad. Once ARM is integrated and standardized within your key business processes, you'll be able to distribute accountability and focus on high value areas of risk management.

## Benefits of using Active Risk Manager (ARM) include:

- Improved decision making with comprehensive data**  
ARM provides a true risk management system of record for the business.
- Users stay ahead of the risks with real-time data**  
ARM collects all risk data and makes it instantly available through executive dashboards, alerts and reports
